Integra has many features of certified glass cockpits with fraction of its price. This is a new dimension in ultralight market. Thank you.

J.M.

I am very surprise with a quality and reliability of the Integra, I am graduated engineer and I saw that Integra hardware design and especially Intel inside is very professional. Good luck with your product.

K.L.

Excellent product, incredible price and very professional customer support. Good job.

H.F.

I'm a tech guy who likes a hitech features. I fell in love with your 3D terrain, it works great. I should not tell you, but I got to troubles due to the bad weather and 3D terrain helps me a lot.

Demo program of Integra was a great idea, I have learn how to use Integra while safe on the ground and not flying right away. I also appreciate possibility to prepare configuration etc at home.

A.M.

I fly a lot and have to often wait for my passanger. I do not mind now, I watch serials from my flashdisk in your entertainment mode of Integra!

E.D.

I have choose your glass cockpit, because not as others, allows me to choose my native French language. Thank you, keep up good work.

M.V.

You offer a best ratio between functionality and price. For me it was a easy decision, supported with a state of the art autopilot servos with a magnetic clutch. No more force in the steering.

... and many others ...

And what about your dashboard?
